# Invitation

Dear Friends,

On behalf of the organizing committee, I extend a warm welcome and invitation to attend the 5<sup>th</sup> edition of our annual Mumbai live EUS course : Interventional EUS 2016

Over the past five years the course has become a must attend for the enthusiasts of EUS and particularly Interventional EUS. Our esteemed faculty has managed to keep the delegates spellbound with their knowledge and skills. This course has grown in parallel with an explosive growth in interventional EUS procedures Worldwide

This year too the emphasis is on new techniques and technology. The first day is devoted to diagnostic EUS and FNA. Apart from lectures and live demonstrations, there will be a hands on training in basic EUS. In the evening Prof Rob Hawes and Shyam Varadarajulu will do a live demonstration from Florida Hospital Orlando, USA. The second day is dedicated to Interventional EUS with lectures and live demonstrations of various established and upcoming techniques like biliary drainage, pancreatic duct drainage, vascular therapy and tumor directed therapy. The third day will be dedicated to hands on training in interventional EUS.

We are fortunate to have a galaxy of experts with us who will share their knowledge, wisdom, and technical tips with you.

The Asian EUS Group has been at the forefront of dissemination of EUS teaching in Asia, and we have been fortunate to have their support over the years. This year too, the AEG will be with us and our sincere gratitude is towards them.

We have limited seats for hands on training and they fill up very fast. I request you to register early to avoid disappointment. Every year we have to say no to a lot of deserving candidates as there are limited slots available.

I hope to see you at this exciting focussed event in March 2016.
